

AHMAD ALVIN GRIFFIN

081210474610 | ahmadalvin92@gmail.com | linkedin.com/in/ahmad-alvin-griffin | https://github.com/ahmadalvin92

Kebon Jeruk, Jakarta Barat

Computer Science graduate from Universitas Diponegoro, specializing in Machine Learning (CNN), Computer Vision, and Full-Stack Web Development. Experienced in developing real-time AI systems (InceptionV3 + ONNX + MediaPipe + OpenCV) and building Laravel–MySQL web applications during an internship at PT Angkasa Pura II. Bangkit 2024 Cloud Computing alumnus with hands-on experience deploying services on Google Cloud Run. Passionate about building scalable, production-ready digital products with strong attention to reliability and clean architecture.

Work Experiences

PT Radio Elshinta - **Jakarta, Indonesia** Dec 2025 - Present

Fullstack Web Developer | IT Support Experience

PT Radio Elshinta is a national radio broadcasting company in Indonesia, focusing on news, information delivery, and live broadcast operations with reliable IT and studio infrastructure.

- Developed an internal IT support ticketing system using React, Node.js, Express, and PostgreSQL.
- Implemented authentication (JWT) and role-based access control (Admin & User) with structured ticket workflow (Open, In Progress, Done).
- Designed RESTful APIs and database schema using Prisma, improving issue tracking and resolution efficiency.
- Provided IT support and maintenance for studio and office systems, including hardware setup, network troubleshooting, and device configuration.
- Ensured system reliability for live broadcast and streaming operations in a high-availability environment.

PT. Angkasa Pura II - **Tangerang, Indonesia** Jan 2024 - Feb 2024

Software Engineer Intern

PT Angkasa Pura II is a state-owned enterprise responsible for managing and operating major international airports across Indonesia. The company focuses on airport operations, infrastructure development, and digital transformation to enhance service quality, operational efficiency, and aviation safety standards.

- Developed a preventive maintenance web platform using Laravel + MySQL, covering authentication, reporting, and monitoring workflows.
- Integrated digital signature, PDF export, and LDAP authentication to support secure multi-division access.
- Built an internal IT device monitoring dashboard with automated PDF reports and structured maintenance logs.
- Improved data accuracy and reporting flow by redesigning relational schemas and backend logic.

Bangkit Academy 2024 - **Remote, Indonesia** Feb 2024 - Jul 2024

Cloud Computing Cohort

Bangkit Academy is a career readiness program led by Google, GoTo, and Traveloka that prepares Indonesian students for roles in Machine Learning, Mobile Development, and Cloud Computing. The program provides industry-aligned curriculum, real-world project experience, and professional mentoring to develop job-ready digital talent.

- Built and deployed a cloud-based ML inference API using Google Cloud Run, Cloud Storage, and API Gateway.
- Implemented containerized applications using Docker and optimized performance for production-ready deployment.
- Collaborated with cross-functional teams (ML & Mobile) to develop an end-to-end stunting detection system.
- Applied cloud fundamentals including IAM, VPC, monitoring, and CI/CD workflows.

Education Level

Universitas Diponegoro - **Semarang, Indonesia** Aug 2021 - Jul 2025

Bachelor The Computer Science program focuses on software engineering, algorithms, databases, and machine learning. The curriculum emphasizes hands-on development, research projects, and problem-solving skills to prepare students for roles in software engineering, data science, and modern IT industries. GPA, 3.57/4.00

- Completed a bachelor thesis project developing a real-time CNN-based gender detection system using InceptionV3, achieving 96.4% validation accuracy.
- Selected as a student in the Bangkit Academy 2024 – Cloud Computing Cohort supported by Google, GoTo, and Traveloka.
- Served as Learning Materials Manager at HMIF, providing academic resources and documentation for Informatics students.
- Participated in various campus events as a mentor, organizer, and volunteer, supporting new student development and department activities.

Organisational Experience

HMIF (Himpunan Mahasiswa Informatika) Universitas Diponegoro - Semarang, Indonesia Feb 2023 - Feb 2024

Learning Materials Manager

HMIF is the official student organization of the Informatics Department at Universitas Diponegoro, focusing on academic development, community engagement, and student support programs.

- Managed and organized academic archives and solution banks used by Informatics students.
- Improved documentation structure to ensure fast and reliable access for hundreds of students.
- Coordinated with academic divisions to review, update, and distribute study materials.
- Supported departmental events and student learning programs.

ANFORCOM 2023 – Annual Informatics Competition - Semarang, Indonesia Mar 2023 - Aug 2023

Promotion & Documentation Staff

ANFORCOM is an annual Informatics competition event organized by the Informatics Department, involving national participants in technology and programming competitions.

- Managed event promotional materials and visual documentation across multiple platforms.
- Supported coordination and execution of competition-day activities.
- Collaborated with the media team to produce event highlights and reports.

Informatics Gathering 2022 - Semarang, Indonesia Aug 2022 - Dec 2022

Logistics Staff

Informatics Gathering is a department-wide event designed to strengthen community bonding among Informatics students.

- Prepared and organized event logistics, equipment, and venue setup.
- Assisted committee coordination to ensure smooth event activities.
- Supported participants and committee needs during the event.

i-Console 2022 - Semarang, Indonesia Aug 2022 - Dec 2022

Senior Mentor

i-Console is an orientation and mentoring program for new Informatics students at Universitas Diponegoro.

- Mentored new students through academic introduction and campus adaptation.
- Led small-group discussions and collaborative activities.
- Supported committee operations during orientation week.

POSITIF / Harmoni / I-Care (Volunteer) - Semarang, Indonesia Aug 2022 - Dec 2022

Event Volunteer

POSITIF, Harmoni, and I-Care are student-led social and academic events aimed at community service, collaboration, and departmental engagement.

- Assisted event operations, participant handling, and on-site coordination.
- Supported logistics, registration, and technical preparation.
- Contributed to smooth execution of department events.

Skills, Achievements & Other Experience

- **Projects** (2026): Developed a fullstack IT support ticketing system using React, Node.js, Express, and PostgreSQL to simulate real-world IT support operations. The application includes authentication and role-based access control (Admin & User) using JWT, along with a structured ticket workflow (Open, In Progress, Done). Designed and implemented RESTful APIs, integrated frontend and backend services, and created a responsive dashboard with real-time statistics and activity tracking. The system improves issue tracking and resolution efficiency by providing a structured and centralized ticket management platform.
- **Projects** (2025): (Thesis/Skripsi) Developed a real-time CNN-based gender detection system using InceptionV3, MediaPipe, and OpenCV. Achieved 96.4% validation accuracy and deployed the model using ONNX for efficient real-time inference.
- **Projects** (2024): Built and deployed a cloud-based ML inference API using Google Cloud Run, Docker, and Cloud Storage. Implemented containerized applications, optimized API performance, and collaborated with ML & Mobile teams to deliver an end-to-end stunting detection system. Applied cloud fundamentals including IAM, VPC, monitoring, and CI/CD workflows.
- **Projects** (2023): Developed CRUD modules, borrowing workflows, and MySQL relational schemas for a library information system. Implemented authentication and admin features using Laravel.
- **Achievements**: • Completed the Bangkit 2024 Cloud Computing program supported by Google, GoTo, and Traveloka. • Achieved 96.4% validation accuracy in a CNN-based gender detection thesis project. • Selected as Learning Materials Manager at HMIF, supporting hundreds of students with academic documents. • Delivered multiple Laravel–MySQL projects including a preventive maintenance system at PT Angkasa Pura II.
- **Hard Skills**: JavaScript • React.js • Node.js • Express.js • PostgreSQL • Prisma • REST API • HTML • CSS • Tailwind • JWT • PHP • Laravel • MySQL • Python • TensorFlow • OpenCV • Google Cloud • Docker • Git • Firebase
- **Soft Skills**: • Problem Solving • Team Collaboration • Time Management • Communication • Adaptability • Analytical Thinking • Attention to Detail • Continuous Learning
